

Iron Filter

Here is the completely carefree automatic four-phase oxidizing system engineered for treatment of iron, iron bacteria and small amounts of hydrogen sulfide. The Hague **HYDROCLEAN³ Iron Filter** is complete with a unique double backwash system that has consistently proven itself in the most difficult applications across the country.

Problem Water Filters Available...

HC3ICF Activated Carbon Filter

This completely automatic carbon filter is the answer to your bad tasting and smelly water. Designed with activated carbon filtering bed to reduce chlorine tastes and odors.

HC3INF Acid Neutralizer Filter

Automatically corrects low pH water. Acid water etches dishes and china, and is harmful to expensive plumbing fixtures, leaving a bluish-green stain.

Chemical Feed Pumps

A common feed pump application adds sufficient chlorine to eliminate "sulfur water". Chlorine reacts with the "rotten egg odor" to precipitate free sulfur. A carbon filter removes the excess chlorine and sulfur, producing odor free and taste free water.

HYDROCLEAN³ is an exclusive product of **Hague Quality Water, International**. Our total involvement in its engineering and manufacturing has allowed us to maintain value and consistent quality.

We stand behind this latest generation of water cleaning equipment, confident that it will exceed your expectations for years to come.

Your Hague dealer has the answers to all your water needs. We manufacture a complete range of water treatment equipment for residential and commercial use.

9 US Patents Earned!

MADE IN THE U.S.A.

Operational maintenance and replacement requirements are essential for the product to perform to specification.

Experience The Difference Of Sparkling Clear Water...

Patented water treatment equipment engineered for reliable operation and money saving efficiency.

WATER

The Way You Want It...

Ground water gathers hardness, iron, unpleasant tastes and odors, and dissolved impurities. Treating water with **HYDROCLEAN³** returns water to its clean, soft, drinkable best...

Taste the difference.

HYDROCLEAN³ water makes a big difference in your life. Gone are the objectionable tastes and odors that may invade everyday tap water. Enjoy the good, natural taste of water.

Feel the difference.

Gone are the hard water deposits that damage hair and the soap curd that blocks skin pores. Also, with clean soft water, your fixtures will sparkle and shine.

Savor the difference.

You'll find food and beverages taste better and look better when prepared with quality water delivered from **HYDROCLEAN³** equipment.

See the difference.

You'll get cleaner, brighter, softer laundry when you wash with soft water. You will also save up to 75% on soap and get longer wear out of your washables.

Pocket the difference.

Ugly stains and soap residues are eliminated. That means less cleaning and more time for you. Scale build-up in your water heater is ancient history. And so are the costly plumbing bills caused by hard or rusty water.

Proven quality in over 200,000 homes for over 7 years...

Dual-Mode, easy-to-use electronic controller

- Timer Mode sets to regenerate every day to every 12th day
- Meter Mode regenerates based on water usage
- Both Modes feature exclusive Capacity Guard™ to protect the softening capability of the resin bed
- Each cycle adjusts from 0-99 minutes
- Flow rate is displayed when water is in use
- Low voltage - 12 VAC
- Displays water available until the next regeneration in liters or US gallons
- 96 hour forced regeneration override
- Power outage protection holds cycle programs indefinitely
- Maintains time of day setting for up to 16 hours in the event of a power outage - without batteries

1" built-in bypass valve

- Bypass valve piston is manufactured using Teflon® and graphite impregnated O-rings for indefinite life

Valve body

- Backwash flow rate adjusts up to 7 GPM with easily-exchangeable flow control buttons
- Whisper quiet
- Counter-current brining
- Teflon®-encapsulated piston provides years of service - tested for over 100,000 cycles
- Full 1" internal porting / self-cleaning venturi
- Quick connect 3/8" brine line connection
- Valve position controlled by exclusive magnet technology - no solenoids or switches
- 1" distributor tube

LIGHT COMMERCIAL

The **HYDROCLEAN³**

- Meter initiated regeneration: with optional savematic valve. Regenerates only as needed, saving salt and water.
- Corrosion proof tanks: features fiberglass wound media tanks and plastic brine tanks for strength, durability and corrosion resistance.
- Maximum resin bed depth: longer water contact, more effective softening and better salt economy.
- Energy-Miser timer: simple and effective and uses a mere 10-15 cents a month in electricity.
